Development List Updates

The City of Santa Maria Community Development Department recently released the January 2010 development lists. The three lists identify the information about Residential, Non-Residential, and Mixed Use development projects in the City. This information shows a picture of changes occurring from July 2009 through December 2009. To assist in site identification, the lists employ mapping tools that give greater accuracy and color to the project location maps.

Links to each list are on the Major Projects Archived Lists page: <http://www.ci.santa-maria.ca.us/54328.shtml>. The lists may be accessed on the Internet using an Adobe Acrobat Reader, which is free and readily available on the Internet.

Questions may be directed to the Community Development Department, 925-0951 ext. 244.
